## Direct electric control - PUSH PULL Actuation

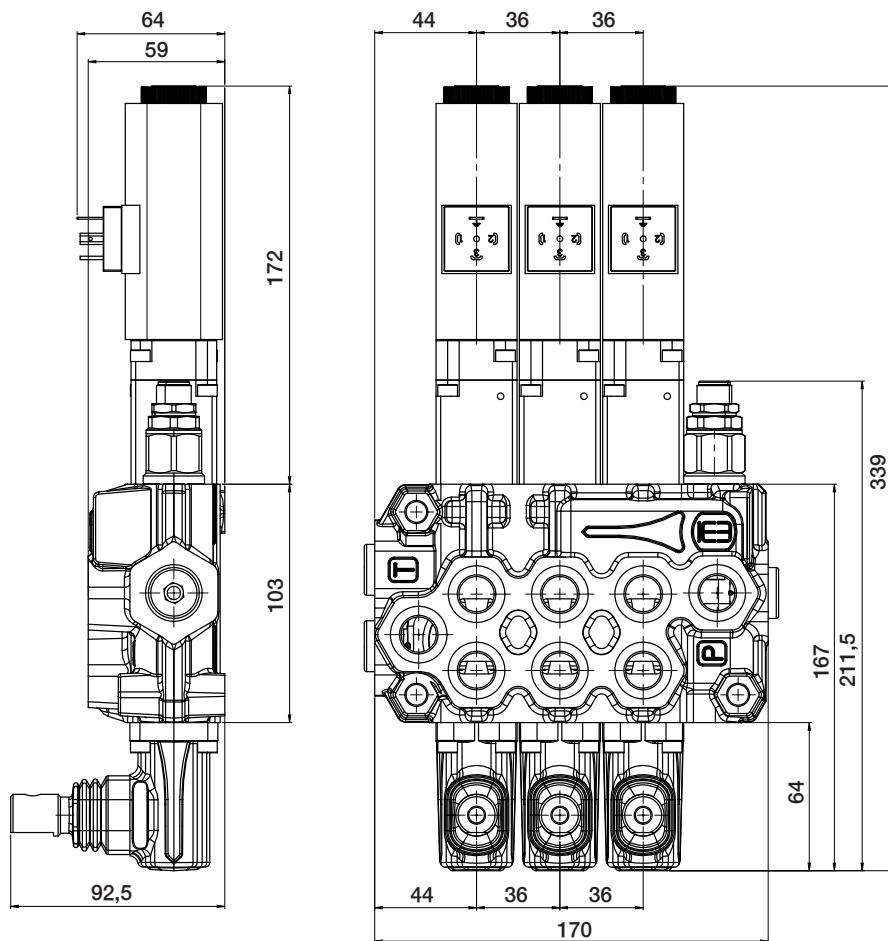

DT.003.00

### FUNCTIONS AND BENEFITS

- The direct electric control PUSH-PULL is suitable for many different mobile applications.
- It allows the remote activation of the valve through the use of electrical on/off switches.
- Allows the use of an override lever actuation for safety.
- The PUSH-PULL actuation needs a special spool.

### DIMENSIONS

- The dimensional drawing represents a ECM08B/3 with direct electric control PUSH-PULL.

### TECHNICAL SPECIFICATIONS

|  |                 |
|--|-----------------|
| <b>Input tension</b>                       | 12 VDC - 24 VDC |
| <b>Permitted working voltage</b>           | ±10% nominal    |
| <b>Power consumption</b>                   | 60 W            |
| <b>ED</b>                                  | 100%            |
| <b>Ohms resistance (cold T°)</b>           | 2,45 Ω - 9,65 Ω |
| <b>Intensity of current (cold T°)</b>      | 5 A - 2,5 A     |
| <b>Ambient operating temperature range</b> | -25°C / +50°C   |
| <b>Protection class</b>                    | IP65            |
| <b>Insulation class</b>                    | H               |
| <b>Standard connector</b>                  | DIN 43650       |
